

## GCF Global – Basic Maths – Online Course

Link	<a href="https://edu.gcfglobal.org/en/topics/math/">https://edu.gcfglobal.org/en/topics/math/</a>
Description	This site has a series of tutorials for people wanting to improve their numeracy skills. Topics range from basic to more advanced numeracy and include addition & subtraction, multiplication & division, decimals, percentages, fractions. The content of each tutorial is clearly laid out with nice graphics and videos.
Media used	Online slides, YouTube video embedded, fillable spaces
Readability	Very well displayed. Steps are numbered and some words are bolded. The website is very easy to follow.
Activities included	Content is interactive with questions, fillable spaces, and quizzes
Multisensory	Visual (charts, graphs, illustrations), T-K (interactivity with screen)
Language level	Early-intermediate and above. Units require learner to read short passages, follow instructions and answer questions.
Prerequisites	Scrolling, clicking arrows to advance slides and choose quiz answers, filling in boxes
Recommended Learning Mode	Videoconferencing where learner shares screen, can be used independently on a smartphone, tablet, laptop or computer
Device compatibility	Laptop, tablet, smartphone, computer
Log-in/subscription	Not required
Cost	Free
Diverse Content	N/A
Canadian Content	No – US/International
Tutor Comment	Section at the bottom provides guidance to tutors. The graphics are colour-coded to help keep track of steps and highlight certain information. I really like this resource!
